Share

In this final article, we will summarize and wrap up the series with all the information that has been provided thus far. There are several complex issues that have been presented in this series, but they are imperative to understanding the long term game that is playing out. As individuals, we must take full advantage of the opportunity that is being presented to us, and not sit on our asses to “see what happens”. The road to Freedom requires everyone, no matter their age, to gradually build their way out of the hell that was meticulously planned for us by the horrible, invisible enemy.

The Jesuit Pope Francis, otherwise known as Jorge Bergoglio has recently died. This man’s legacy must never be forgotten. In our article, [The Prussian Pontiff](#), we provided brief history of the man who aided and abetted the fascist Videla regime of Argentina during the 1970s. Many children went “missing” during the reign of this despotic regime, and Jorge found himself square in the middle of many of the accusations circling around this dark period in Argentine history. Regardless, he eventually became the head of the Vatican. Whats more, as many Dutchmen already know, one of the daughter’s of the henchmen during this period became the princess of the Netherlands, and is now Queen Maxima, wife to the King of the Netherlands, from the house of Orange. On the other hand, Queen Maxima’s sister, Ines Zorreguita, is now dead after an apparent suicide by doorknob hanging.

Ines decided to clean and make some inventory of his properties, and what she found would be instrumental in her demise. Ines accidentally found a video gallery and blackmail vault. These films exposed several HUGE political figures from the '70s and '80s raping women and children on film.

[1](#)

On the same weekend as the death of Pope Francis, another strange event occurred. Herr Klaus Schwab resigned from the ReichsWEF lock, stock and barrel. His resignation comes amidst many rumors of improprieties, misuse of funds, and outright despotism. We are hardly surprized by these rumors. After all, it was Klaus who invite an array of Socialist Bishops, ex-Nazis, and former British Prime Minister Edward Heath to chair the ReichsWEF in Davos. Eddie was the conductor for the UNESCO sponsored Orchestra to celebrate the *International Year of the Child*. We found this to b an odd moment in ReichsWEF history, because Eddie was posthumously embroiled in one of the worst, satanic child abuse rings in British history.

The Satanist Cult of Ted Heath: Ethical Implications of Authority Compromise

Published online by Cambridge University Press: 23 March 2020

Introduction

Seven UK police forces are currently investigating the alleged involvement of the late Edward Heath (Prime Minister 1970–1974) in a child abuse ring with Operation Midland investigating specifically the alleged murder of three boys.

Objective

The presentation raises international awareness of the investigation, sheds light on the suspected 'Satanist' ideology behind the cult and explores the implications for professional practice.

[2](#)

With Klaus now gone, another super-villain has taken his place as the temporary chairman of the ReichsWEF.

 **Carole Mac** 
@HerbsandDirt · [Follow](#) 

Klaus Schwab is out. This guy is in. 🙄🙄

Meet Peter Brabeck-Letmathe, former CEO of Nestle, who famously stated in 2017:
“Humans have no right to access free water.”

Be careful what you wish for.

You simply cannot make this stuff up!!

Perhaps our readers are wondering what all this has to do with the *Scamocracy* series. It illustrates that the horrible invisible enemy is cleaning house and about to double and triple down on their agenda to enslave humanity.

The entire premise of #PrussiaGate is that over the last century the Enlightened Despots of the world have feigned their defeat after WWII. At the end of WWII, the state of Prussia was abolished, erased from the geopolitical stage. However, the cult of Prussia did not die with the state of Prussia. Instead, they transformed into a myriad of global corporations, and gradually penetrated nations around the world to shape global policy and control the world we currently live in today. Free from the chains of international treaties and agreements, they were now able to operate in the shadows and become invisible to the unsuspecting citizen.

Using the Bilderberg group, the WEF, and the UN (which includes the WHO and UNESCO), Enlightened Despots used international law and mandates to chain down sovereign nations and slowly take control of the world's resources and supply chains.

No better example of this is the company that the new Chairman of the WEF controlled for many years. Nestle is one of the world's largest food and beverage companies. The crap this company has been putting into the food supply has quite literally caused untold sickness and disease.

Nestlé subsidiary Perrier destroys two million bottles of water after 'fecal' bacteria discovery

Nobody enjoys drinking shitty water, and the last place one would think they would find such poison is in a bottle of Perrier. Now with freaky Pete at the helm of the ReichsWEF, one can only imagine what their next move might be.

Pope Francis and Herr Klaus have exited stage left, but the globalist CEOs, corrupt politicians and central bankers are still happily looking forward to their next ski trip at Davos. They have gone nowhere, and have no intention of backing down. We are at a point in history where the events that take place today will shape the world for generations. We either remain vigilant until every ReichsWEF traitor is exposed and brought to justice, or we sit back and look at what they have in store for We the People.

President Trump and his team are under attack from all angles within the Republic. Whether it is corrupt judges, deranged blue-haired pro-EV anti-Tesla PAntifactivists, or certain members within the Pentagon that James O'Keefe continually exposes as they openly tout a resistance to Trump and Sec Def Pete Hegseth, the enemy is deeply embedded and not backing down.

These Tyrants will fight Freedom at every turn in their plight to turn the world into Soviet-style, carbon lockdown gulags. We must expose their Scamocracies so that sovereign nations can finally find the will to change and take down the horrible invisible enemy once and for all.

What is a Scamocracy?

In part 1, we used the ancient parable of the *Great Rice Contract* to show how compounding debt contracts can financially destroy an empire from within. However, its not bad news for everyone in the empire, because those who are in on the scam become fabulously wealthy as wealth is rapidly transferred from the citizens and into the coffers of the *Scamocrats*.

After WWII, Western civilization embarked on an ambitious welfare program for its citizens. At the time, nobody could argue that the soldiers who survived the enormous sacrifice to defeat the Nazis and the Imperial Japanese needed some form of compensation to get on with the rest of their lives.

However, 80 years later, the same pension system afforded to the great generation has expanded to cater for everyone, including the “Climate Champions” who have illegally

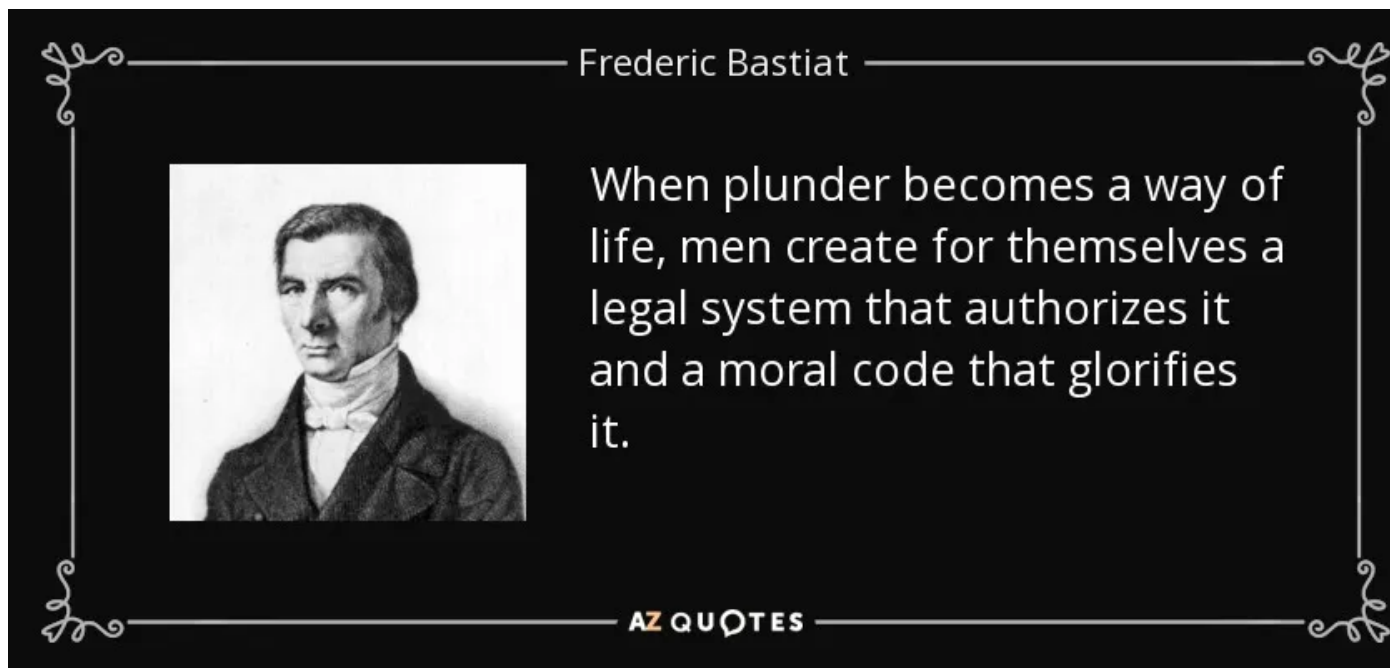

migrated to every Western nation on earth to get a piece of the action. How is the West ever going to afford to fulfil their unfunded liabilities?

In short, it is an impossible contract that will eventually bankrupt nations who continue to pretend that this scam is an affordable reality. Regardless, economic migrants continue to flood into the West and receive insane financial compensation packages. Eventually, the system we live in today will simply collapse under the weight of its own bullshit.

When one looks at the unfunded liabilities of all Western nations, it does not take a rocket scientist to work out that these are simply impossible to fulfil. However, sovereign citizens continue to go about their daily business and pay any and all taxes to their respective governments in the hope that the impossible will one day be achieved. Whats more, many people, particularly in Europe, will desperately cling to the notion that one day their retirement benefits will allow them to live to a comfortable old age. Not only will they continue to pay into the lie, but they will patriotically vote for the politicians who continue to propagate the lie.

When a citizen believes and votes for a lie, the politician who knowingly propagates that lie has gained power from a scam. At that moment, democracy has transformed into a *Scamocracy*.

When *Scamocrats* take control of the State, plunder becomes the flavor of the day. Lies are peddled as a means to secure votes and maintain power. The People are convinced of a future Utopia of free stuff, less work, and more free stuff. The laws of the land are gradually transformed to deprive the private citizen of their wealth, and hand it to the *Scamocrat* class.

Gradually, the system becomes completely unrecognizable from its original form and intention. Nothing is new under the sun, and there are brilliant men throughout history who understood all too well what happens when a *Scamocracy* takes hold:

In the parable of the *Great Rice Contract*, we showed how the Chess inventor deliberately deceived the emperor into an unpayable, unfunded liability. Knowing

perfectly well that the empire would eventually collapse, the Chess inventor was happy to let the empire fall, so long as he could rule over its ashes in the future.

Today, the parable applies to Western civilization's unpayable debts and unfunded liabilities. The system has been corrupted by *Scamocrats* who, like the Chess inventor, have already been thinking of creative ways to rule over our ashes when the system inevitably collapses.

WEF pushes digital ID, CBDC, ESG & crackdowns on 'misinformation' in Future Focus report

"These [vaccine] passports by nature serve as a form of digital identity" — World Economic Forum, February, 2022

"The transition to a lower-carbon economy requires a large rewiring of the global economy, with some \$3.5 trillion of investment needed annually for decades" — World Economic Forum, Future Focus 2025

Finance plays a pivotal role in facilitating the transition to a net-zero economy, and innovative approaches are needed to bridge the net-zero funding gap" — World Economic Forum, Future Focus 2025

[8](#)

Given all the existing sovereign debt and the mountain of unfunded liabilities yet to be paid, just where does the ReichsWEF think all this extra finance is going to come from?

The Scamocratic Industrial Complex

In 1913, the Federal Reserve and income tax were introduced into America. This allowed a private central bank to expand the money supply as it saw fit, while the federal government could also expand its operations and raise money in the debt market that could be paid back through the collection and expansion of income taxes.

In part 2 of this series we provided the brilliant work of Henry Hazlitt's book, *Economics in One Lesson*, which stated:

The art of economics consists in looking not merely at the immediate but at the longer effects of any act or policy; it consists in tracing the consequences of that policy not merely for one group but for all groups.

[9](#)

Hazlitt, and other economists at the time, could see that the Federal Reserve and income tax would be a disaster in the future. Others, however, promoted the institution and the ability for the federal government to step in and respond to any crisis as they saw fit.

ECONOMIC GROWTH

What Keynes can teach us about government debt today

Jun 5, 2019

John Maynard Keynes, the British economist whose theories dominated the industrial postwar West argued for government spending as a means to counteract slow economic growth. Especially during a recovery from a recession or depression, he reasoned, private demand is insufficient, so extra spending by government is needed to ensure that aggregate demand remains high enough to maintain full employment.

[10](#)

Keynes became the poster child for the justification of rampant government spending in times when an economy is going through tough times. His worldview permeated through the halls of academia, but even Keynes understood that reactionary monetary

and government policy could lead to catastrophic unintended consequences in the future.

Over a century later, as Keynes and all of his mates are resting peacefully in their graves, we are now suffering under the disaster of central banking and governments responding to a mountain of ill-conceived crises that are embedded in the imagination of Scamocrats.

Wars and welfare programs now dominate Western civilization. Politicians of every persuasion are now addicted to solving problems with more government, more debt, and more taxes. Globalist corporations and the billionaire *Scamocrat* class are the ultimate beneficiaries of these policies, and central banks are the pillar by which these policies can be financed. This is why there is a continual revolving door between politicians, bureaucrats, and the firms that benefit from unrelenting runaway government spending.

So when we ask ourselves how government debt and unfunded liabilities can ever be paid, we only need to look at what central banks are planning for the future. Central

Bank Digital Currency, as the name directly suggests, is their solution.

JUNO NEWS

Mark Carney's "Values": Central bank digital currencies are the "future of money"

Carney's "Values": A new investigative series by Juno News that takes the Liberal leadership hopeful's own words as a launch pad to uncover his beliefs, background and vision for the world.

FEB 15, 2025

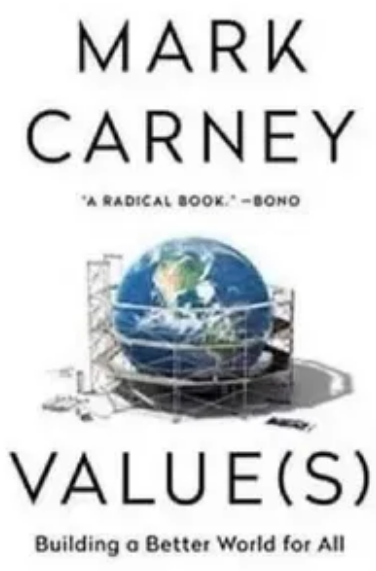

[11](#)

Mark Carney is to Canada what the Nestle CEO is to the ReichsWEF; bad to worse. Carney has been a Governor of the Bank of England, the Bank of Canada and a ReichsWEF board member. He is unashamedly open about his worldview:

MARK CARNEY IS INSANE!

"Western society is morally rotten, and it has been corrupted by capitalism, This requires rigid controls of personal freedoms, industry and corporate funding. This is not a promise to make the lives of ordinary people better but temporarily worse. This will be a world of severely constrained choice, less flying, less meat, more inconvenience and temporarily more poverty. Assets will be stranded, Gasoline cars will be unsellable and inefficient properties will be un-rentable"

~Mark Carney, in his book, "Values: Building a better world for all"

While Carney ridicules capitalism, he has amassed a small fortune under the capitalist umbrella.

What is Mark Carney's Net Worth?

Mark Carney's net worth is estimated at \$300 million as of 2025, reflecting his multifaceted career and business acumen.

Mark Carney's business ventures extend beyond traditional banking, showcasing his visionary approach to sustainable finance. His investments span green energy, technology startups, and innovative advisory services, each selected for long-term impact.

[12](#)

When we put this all together, it is not hard to see how Carney generated his wealth. Government policies concerning climate change create new regulations which force many industries to either shut down their business activities or redirect investment to comply with “sustainability” mandates. This redirection of capital falls squarely in the hands of Mark Carney and his buddies in the form of “strategic financial decisions”:

The Impact of Global Economic Shifts on His Strategies

Global economic shifts have continuously shaped Mark Carney’s strategic financial decisions, influencing public policies and private investments. He adeptly navigates international market fluctuations and regulatory changes by adapting his approach to emerging trends.

[13](#)

Today, this is how the scam works. Governments create policies that destroy competition and redirect capital to the chosen corporations that promote “sustainability”. CBDCs, which is simply programmable money, will create “*a world of severely constrained choice, less flying, less meat, more inconvenience and temporarily more poverty*”. At the same time, trillions will flow into the coffers of those who denounce capitalism, but earn billions in the process.

Carney is not alone. Nestle, for example, wants to profit from the sustainability scam by building back better cocoa farms.

Our vision for a brighter future

The Nestlé Cocoa Plan is built on three pillars:

Better farming, better lives, better cocoa.

[14](#)

Competition in the cocoa market will be destroyed under such a plan, and Nestle will consolidate its monopoly, regardless of their actual, very questionable, business practices:

Crime & Controversy: Nestle's 5 Biggest Scandals Explained

Nestlé, producer of countless products and sub-brands, from Nescafé and Milo to Abuelita syrup and Purina dog foods, as well as scores of iconic chocolate bars and candies, is **the world's largest food and beverage company**.

1. The Baby Formula Scandal
2. Child Slave Labor
3. Exploiting Drought-Ridden Areas
4. League-Topping Plastic Pollution
5. Contaminating Groundwater

[15](#)

Not even the Nazis could have imagined the ambitious re-organization and monopolization of global capital into the beast that is the ReichsWEF.

Mark Carney openly touts the disintegration of the average Western citizen's standard of living. In the words of Keynes, not only are we all going to be dead in the long run, but screwed to death in the process:

[16](#)

Unless you have been in a coma for the last decade, President Trump and his team are hated by the globalist *Scamocrat* class. Why?

The New Golden Age

Capping the Knees of Global Communism

In part 3, we showed how CCP China has benefited greatly from the globalist *Scamocracy*. By 1970, Mao Zedong had run the country into the ground. However, after a visit from Henry Kissinger and David Rockefeller, the prospects for the Chinese Communist Party took a drastically positive turn.

Rockefeller & Kissinger Pressure Mao to make a Grand Bargain

In 1973, **David Rockefeller** visited **Mao** to discuss the opening up of the country's economy. His family's foundation had spent sixty years funding birth control studies in **China**, as **John D. Rockefeller III** once said population as an "outstanding problem" for the country. Within two weeks, **China** established the **Family Planning Leadership Group**.

[17](#)

The New York Times

From a China Traveler

By David Rockefeller

Aug. 10, 1973

The social experiment in China under Chairman Mao's leadership is one of the most important and successful in human history. How extensively China opens up and how the world interprets and reacts to the social innovations and life styles she has developed is certain to have a profound impact on the future of many nations.

[18](#)

There is so much to unpack from David Rockefeller's musings about China. A social experiment? Social innovations and lifestyles? Abortion policies for a population that has an outstanding problem? Just wtf was this lunatic determined to accomplish in China with the CCP as his partner in crime?

In the 1970s, China opened up their labor market to global capital. In turn, globalist corporations gradually began shutting down their factories in the West and rebuilding them in China. At the same time, a vast array of environmental and labor regulations swept into Western nations, making it close to impossible for any competition to be formed in America, Europe or Australia.

In this way, Western governments stuffed trillions of dollars down the gullets of globalist corporations. Similar to Nestle and Mark Carney, these corporations were congratulated for their “strategic financial decisions”, while the average worker suffered under decades of inflation and industrial foreclosures.

Today, the effects of the policies of Kissinger, Rockefeller and the CCP have come home to roost. Similar to Keynes, these thought leaders of the 20th century are now dead, and we are left with the shit they left behind.

The Chinese people are about to suffer the most:

⇒ **Newsweek**

China Plunges Deeper Into Unprecedented Population Crisis

Published Jan 17, 2025 at 1:05 PM EST

[19](#)

After decades of hundreds of millions of abortions and a one-child policy, China’s demographics are an unmitigated disaster. The population will most likely halve over the next 50 years, but the worst disaster lies in the ageing population. There will be

very few young people to support the unproductive older people, who believe they have earned their right to retire.

With less people comes less demand. There simply will never be the magical unicorn of demand that so many economists have been touting in the West for the last 50 years. Therefore, many globalist corporations which placed their hopes on future Chinese demand will be dealing with trillions of dollars that were misallocated in a nation that faces a demographic and geopolitical collapse.

But the story does not end there. Kissinger and Rockefeller's pressure on Mao to open up his slave labor force to the world forced trillions of dollars of manufacturing capital to migrate into China. As the population collapse will destroy Chinese demand, China will also inherit an enormous, unprecedented over-supply problem.

The Wall Street Journal

Why China's Overcapacity Problem Is About to Get Even Worse, in Seven Charts

Story by Nathaniel Taplin • 10mo •  4 min read

Cheap Chinese high-tech goods have flooded the global economy this year, raising alarms in Washington and Brussels as Western businesses complain about what they see as a new round of unfair competition.

[20](#)

Today, most people are aware of how prices are determined by the supply-demand curve. During the 1920s, the enormous credit doled out by central banks around the world created a stock market boom. This boom in stock prices allowed businesses to rapidly expand their operations and supply more and more goods into the economy. Demand remained strong throughout the 20s, until the Federal Reserve tightened monetary conditions, and triggered the 1929 crash. As people began to lose everything including their kitchen sinks, demand in the economy cratered while supply of goods into the economy continued. The Great Depression ensued. The stock market lost 90%

but prices for everything collapsed in the process. It was a death spiral that sparked chaos around the world, gave way to the rise of Hitler and FDR, and a decade long march toward WWII.

China today faces the same problem, but with a demographic collapse it could be multiples worse than the Great Depression. As the fake economy collapses in the CCF the only option they have is to export their deflationary collapse to the rest of the world. The overcapacity problem they have will flood the world with cheaper and cheaper goods in a vain attempt to stave of their own collapse. What's left of Western businesses will also collapse as they will be unable to compete with the dirt-cheap products coming out of China. Therefore, the corrupt totalitarian communist policies that the CCP have forced on their own citizens will end up taking down the rest of the world in the process.

The CCP should collapse, along with everyone who supported it and made trillions of dollars from it over the last 50 years. But how can we stop the communist infection from destroying our own economies?

Separating from the WTO is a great start. After all, they were the ones that facilitated the exponential rise of the CCP:

Exclusive: US pauses financial contributions to WTO, trade sources say

By Emma Farge

March 29, 2025 12:58 AM GMT+11 · Updated a month ago

[21](#)This strategy will only work for a while. In the end, the only way a nation can survive the pending deflationary collapse of China is to stop them from exporting their slave labor and cheap goods into one's own country.

The other way to dislocate from the pending CCP disaster is with tariffs. Big, beautiful tariffs.

News | Trade War

Trump-China tariff war: Who's winning so far?

After United States President Donald Trump suspended his “reciprocal tariffs” on major US trading partners on [April 9](#), he ramped them up on China's goods. US trade levies on most imports from China have climbed to 145 percent. Beijing retaliated with duties of its own, at 125 percent on US goods.

Trump has long accused China of exploiting the US on trade, casting his tariffs as necessary to revive domestic manufacturing and reshore jobs back to the US. He also wants to use tariffs to finance tax cuts. Most economists remain sceptical Trump will achieve his aims.

[22](#)

The most important thing that has transpired with the tariff-game thus far is that as Trump eased the tariff pressure on other nations, he escalated it on China. This is not just about the CCP, but about every piece of garbage globalist who has capitalized on Chinese slave labor and climate-free regulation, while at the same time lobbying for their own nations to be crushed with draconian labor laws, insane energy restrictions and climate regulation; just like Mark Carney and Nestle have done.

China has distorted the economic landscape for decades. Their credit bubble has fuelled the growth of “ghost cities” that are built on pillars of shady banking practices

that seemingly go unnoticed by Harvard-trained economists. Ghost Chinese companies have listed on the NYSE as ADRs and have extracted hundreds of billions of dollars of investment capital from American pension funds. Entire nations have become dependent on export demand that would never have prevailed if a fair and level-playing field existed when China entered the WTO in the first place.

As the China story unfolds, many will be blindsided by the pace and extent of the CCI wrecking ball. President Trump's tariffs will act as a quasi-shield in the economic fallout. In the immortal words of the band, Cypress Hill:

“When the shit goes down you better be ready”

The Economic Generals

Many pundits are criticizing Trump and his team for continuing to pursue tariffs as a means of tax revenue over and above the taxing of income on its own citizens.

However, the men whom he has placed at the forefront of this battle could not be more experienced or accomplished in the wild game that is the financial markets.

The New York Times

A former bond trader who amassed billions on Wall Street, Mr. Lutnick has become one of the loudest salesmen for tariffs in an administration generally unified on their benefits. He has publicly echoed the president's message that big tariffs are needed to revive American industry, and that if companies don't like them, they should build factories in the United States.

[23](#)

Howard Lutnick began his career with Cantor Fitzgerald. They were a very professional outfit. During the 911 attacks, a huge chunk of the Cantor desk was wiped out in the World Trade Center attacks, including Lutnick's own brother.

Lutnick knows his math, and the numbers he is crunching in the tariff game are designed to bring America back from the brink. Not only does he wish to see the revival of American industry, but he wants to make sure that the American consumer has a lot more money in their pocket to consume and/or invest with American industry.

President [Donald Trump](#)'s goal is to eliminate taxes for people earning less than \$150,000 per year, Commerce Secretary Howard Lutnick has said.

"I know what his goal is – no tax for anybody making under \$150,000 a year. That's what I'm working for, Lutnick told [CBS](#) News on Wednesday.

He said that major tax cuts could be implemented without causing spiraling national debt through tackling overseas tax fraud.

Commenting on Trump's tax proposals, Lutnick said: "The rest of the world leans on our economy, breathes off our economy - not only is our economy \$29 trillion, but we consume \$20 trillion a year. We are the buyer of everybody's stuff."

[24](#)

The other man at the forefront of this battle is an ex-Soros protegee, Scott Bessent.

Treasury Secretary Bessent says it's up to China to de-escalate trade tensions

Markets are on edge over the direction of tariffs following President Donald Trump's April 2 announcement of broad-based global duties.

“I believe that it’s up to China to de-escalate, because they sell five times more to us than we sell to them, and so these 120%, 145% tariffs are unsustainable,” Bessent said during an interview on CNBC’s [“Squawk Box.”](#)

[25](#)

It is no secret that #PrussiaGate has very little time for old ball-bag eyes, George Soros, who got his start at the old Prussian-legacy investment bank, Arnhold & S. Bleichroder. We detail the many strange activities of Soros in [The ReichsWEF – Part IV](#). Soros’ specialty trade was breaking nation states and their central banks through a series of “strategic financial decisions”. He was also embroiled in an insider trading scam, alongside Ghislaine Maxwell’s father, Robert Maxwell.

Regardless, the way in which Soros “broke the Bank of England” in 1992 ended in a billion dollar profit that cost the British taxpayer 3.3 billion pounds, and a nasty recession ensued. The UK central bank was unable to fend-off the attack by Soros, because the nation was already in a dismal financial state.

Fast forward to today, and the previous US Treasurer and former Federal Reserve Governor, Janet Yellen. The last time Janet Yellen visited the CCP, she got high from the magic mushrooms she was served. We’re not sure if this placed her into a state of permanent delusion, but the actions she took at the Treasury has placed the United States in almost an identical position to the UK back in 1992.

Janet Yellen will finally step down from her role as Treasury Secretary in January, leaving a massive mess for her replacement, Scott Bessent. The budget deficit surpassed \$36 trillion under the Biden-Harris Administration, with Yellen touting that the US had an endless supply of funds to spend and imaginary success of Bidenomics.

To make a long and complex story short and to the point, Yellen's legacy as Treasurer will go down in history as some sort of sick joke. Not only were Treasury funds completely misallocated into ridiculous Bidenomic strategies, she heavily front-loaded the federal government's borrowings. What this means is that most of the money she borrowed from the bond market will be falling due in the very near term, forcing the Trump administration into refinancing the debt at a horrifically high rate.

This will eventually place the US bond market in a precarious state, which Soros-type traders could front run and potentially break the US, just like George did to the UK back in 1992. Front and center of this current fiasco is Jerome Powell, who refuses to accommodate Trump's economic policy and is keeping interest rates as high as possible.

Treasurer Scott Bessent, with his intimate knowledge of Soros' strategies, will be acutely aware of this predicament, and we have no doubt he has a strategy to mitigate this risk. There are many ways this can be accomplished, but this is not the focus of this series.

What is important to note is that we are in a truly global economic war between Freedom and Tyranny. One side wants economic carnage that forces We the People into a permanent state of debt servitude, climate lockdowns and taxation gulags. The other side wants to reduce tax, stimulate domestic economic productivity, and free the American taxpayer from the nightmare.

A Truly New Golden Age

The most productive period in American history was from 1870 until 1913. The nation had no income tax or central bank. Transactions were carried out using gold and silver as money. But that does not explain the whole story.

In part 2 of this series, we showed how slow and steady growth of an individual can lead to a many-fold increase in prosperity over a few decades. Money that is invested during this time can have a positive compounding effect that improves the standard of

living for future generations. In order for this to occur, production and trade needs to be freed, as much as possible, from regulations that hinder this growth. President Trump and his Economic Generals are laying the foundations for this to occur.

In part 3 of this series, we showed how transactions that occur between tribes act as a motivator for others to participate in future trades, which in turn supplies more and more goods to the broader economy. In order to become a prosperous nation, transactions of all kinds need to occur. Innovation, and geographic variability stimulate trade. With that in mind, America has, without doubt, the most economic potential of any nation on earth.

This is not hyperbole. One needs only to look at a map to understand the true wealth of America.

With the Atlantic Ocean to the East, it has a direct trade route with Europe and Africa. With the Pacific Ocean to the West, it has direct trading routes with Asia and the South Pacific. To the North is the abundant resource rich nation of Communist Canada, and a similar situation exists with South America. Within the United States itself is near unlimited quantities of energy, resources, fertile food producing land and water. There is no other nation quite like it on the planet.

This is why, despite the abysmal economic and central bank policies of the United States over the last century, America is still the largest economy in the world. Despite every other civilization on the planet having over a thousand years head start on America, they have never managed to keep up with its economic growth. They simply do not have the same potential.

After the Civil War, the Prussian and British aristocracy made vast fortunes by investing in US government debt and ensuring America paid them back, with interest. From 1870 to 1913, not only did America make good on their debt obligations, but they also grew into an economic superpower. The population exploded as productive migrants came to the nation to contribute and prosper from the American dream. Not to receive benefits, but to benefit from their hard work and business acumen.

President Trump's own family is a prime example of this amazing period in economic history.

As Trump and his team try to right the wrongs of the past century, it is up to every individual, regardless of their age, to start contributing to the slow and steady exponential growth that lays ahead. Innovation requires real education coupled with an appetite for risk. Productivity requires hard work and perseverance. Trade requires the globalist *Scamocracy* to be shackled down so that we can get on with doing business.

What lays ahead is going to be a bucking bronco of a ride, but America has all the cards. As for the CCP, the *Scamocrats* and every other Tyrant that is trying to stop We the People from reaching our true potential, they simply need to get the hell out of the way!!!

The End

China Plunges Deeper Into Unprecedented Population Crisis

19

Published Jan 17, 2025 at 1:05 PM EST

After decades of hundreds of millions of abortions and a one-child policy, China's demographics are an unmitigated disaster. The population will most likely halve over the next 50 years, but the worst disaster lies in the ageing population. There will be very few young people to support the unproductive older people, who believe they have earned their right to retire.

With less people comes less demand. There simply will never be the magical unicorn of demand that so many economists have been touting in the West for the last 50 years. Therefore, many globalist corporations which placed their hopes on future Chinese demand will be dealing with trillions of dollars that were misallocated in a nation that faces a demographic and geopolitical collapse.

But the story does not end there. Kissinger and Rockefeller's pressure on Mao to open up his slave labor force to the world forced trillions of dollars of manufacturing capital to migrate into China. As the population collapse will destroy Chinese demand, China will also inherit an enormous, unprecedented over-supply problem.

 The Wall Street Journal

Why China's Overcapacity Problem Is About to Get Even Worse, in Seven Charts

Story by Nathaniel Taplin • 10mo •  4 min read

Cheap Chinese high-tech goods have flooded the global economy this year, raising alarms in Washington and Brussels as Western businesses complain about what they see as a new round of unfair competition.

There is a lot of mis-dis information here as well as lots of missing facts, especially on China. The gh city bs is a telling sign of the non stop anti China propaganda as those cities are all populated now & expanding. The Chinese population crisis is endemic to all western countries and I am quite sure an authoritarian govt that could mandate a one child policy can mandate a 2 child policy. The western solution is to dilute a smart advanced civilization with a bunch of third world ignoramuses. The Chin govt works for China and has created the greatest economic upheaval for its people since the USA created the biggest middle class in history in the 1950s. You would think Americans would admire th USA was a great nation then but has been destroyed by ZOG. In the article you refuse to tackle the elephant in the room that is the zionist tribal psychopaths/ pedophiles that manipulate the US govt. Trump is entirely on board with them so it guarantees the death of the empire. It's too late. China, Russia, Iran and a growing number of countries have decided not to bend the knee to the tyrant. Ev member of congress has their AIPAC minder. The permanent deep state is mostly Jewish as well as banking, media etc. You rail against WEF when you know very well that all those zionists were the or who transfered the US economy to China. It has backfired on them as the Chinese just proved to be smarter than them and decided not to be the slave labor. The GDP of China is production. The GDP USA is fake money financialization. Guess who wins in a real war. Identify the scammers first then th solution is actually easy.

Another excellent post revealing the plans (past, present, and future) of the would-be slave owners & feudal lords. Like Trump himself, who worked (or infiltrated) the worlds of construction, entertainme financial, etc., before running for office, he now has equally experienced men as you've shown who, knowing the enemy intimately, will do their part in defeating the global elites and their minions.

God has truly gifted many with unique and not-so-unique qualities and experiences for this huge ba between good and evil.

Thank you for assuming the responsibilities associated with your God-given gifts and educating so many of us with your work. God bless you.
