I was lucky enough to attend the PIT event hosted by Catherine Engelbrecht and Gregg Phillips of True the Vote which was held the weekend of August 12th. The information they revealed was jaw-dropping. The PIT provided attendees with the Tiger Project information, and like many other diggers from this community, I have been digging into the data ever since.

Catherine and Gregg found massive corruption when they stumbled across Konnech Inc., an American election technology company founded in 2002, based in Okemos outside of East Lansing, Michigan.

Konnech's website describes their PollChief software products, which include the Election Worker Management System, Asset Management System, and the MyBallot Tracking System. These are supposedly used by "thousands of Election Offices across North America."

During the PIT event, Catherine and Gregg shared a slide showing all the major counties in which to focus our research. In my research, there was one county that stuck out to me the most:

The reason this county stuck out to me is because of its size. Los Angeles County has more than 500 political districts and 5.2 million registered voters. It's the largest and most complex county election jurisdiction in the Country and I think that makes it an easy potential target for election fraud. The PIT documents revealed that there is a connection to Konnech Inc. in LA County, but a deeper dive revealed that there appears to be much more troubling connections.

There is something weird happening in LA county and it has left me with some questions.

## Dean Logan

In order to get to the bottom of what is going on with the elections in LA County, we need to start by looking into [who is at the top](#).

[+ Subscribe](#)

Dean C. Logan oversees the Los Angeles County Registrar-Recorder/County Clerk. The department is responsible for registering voters, maintaining voter files, administering federal, state, local and special elections and verifying initiatives, referenda and recall petitions. Los Angeles County, with more than 500 political districts and 5.2 million registered voters, is the largest and most complex county election jurisdiction in the Country.

Logan just completed a two-year term as president for the California Association of County Clerks and Election Officials (CACEO). He also serves on the California State's Language Accessibility Advisory Committee, on the Board of Directors for the National Election Center and as an advisor to the MIT Election Data Science Lab.

+ Subscribe

He has more than 25 years of experience in elections administration, records management, and public service. Prior to moving to Southern California, he served as the director of records, elections, and licensing services for King County, Washington; as state elections director for the Washington Secretary of State; and as the elected county clerk and chief deputy county auditor in Kitsap County, Washington. He is an active participant in the Future of California Elections collaborative, an initiative sponsored and funded by the James Irvine Foundation. Past work includes serving on the California Statewide Voter Registration System Advisory Committee and on the Pew Center for the States Voter Registration Modernization and Election Performance Index Working Groups. He is also an instructor for the MPA program at California State University, Northridge. He holds a degree in organizational leadership from Azusa Pacific University and an executive MPA from the Evans School of Public Policy and Governance at the University of Washington.

---

Dean Logan has been in the election world for decades starting his career in Washington state. [His time there didn't come without controversy:](#)

---

If you were following Washington State politics in 2004, you'll remember a tight gubernatorial election. Chris Gregoire, then the sitting Democratic Attorney General, faced off against State Senator Dino Rossi, a Republican and former chair of the Senate Ways and Means Committee.

+ Subscribe

It was a close race. Rossi was declared the winner by 261 votes. Democrats had held the governor's mansion for 20 years. Rossi's win was a big deal.

But, state law requires an automatic recount when the vote is both within 2,000 votes and less than 0.5% of the vote total.

After the recount, Rossi remained ahead by 42 votes.

Republican Secretary of State Sam Reed suggested that a manual recount might be in order. Gregoire agreed. A candidate can request a manual recount if they pay for it. Paul Berendt, Chair of the Democratic Party at the time, had to raise almost over a million dollars on very short notice to cover legal and recount expenses.

Ahead of that final manual recount, the King County Director of Elections **found 573 ballots** that had been improperly rejected during the previous counts. When those ballots were tabulated as part of the final manual recount, Chris Gregoire was ahead of Dino Rossi by 129 votes.

The Director of Elections at King County in 2004 was Dean Logan.

---

So the same guy who happened to find the votes needed to help Chris Gregoire pull off a miracle in Washington back in 2004, went on to become the man running the show for all things related to elections in LA County. Logan is the "mastermind" behind the [Voting Solutions for All People \(VSAP\) project which he began in 2009](#) - the same year he became the Registrar-Recorder/County Clerk (RR/CC).

---

 + Subscribe

Logan's \$300-million project, known as [Voting Solutions for All People](#), or VSAP, is a massive undertaking that has been a decade in the making. It will replace L.A. County's antiquated system with new machines and a new process in hopes of making voting more secure, transparent and accessible for voters.

Ballots — and the [31,000 new machines](#) used to mark them — will look and feel different. The entire process will be more digital, but with analog components throughout for security and accessibility. Tallying all the votes should be easier and safer. Polling places will change too.

"His vision has always been to create a new voting system," Marilú Guevara, executive director of the League of Women Voters of Los Angeles. "He would have people voting at Starbucks, if he could find a responsible and secure way to do it."

But when Logan became registrar-recorder and clerk in 2009, he set his sights on transforming the voting system, starting with a principle that voters' needs would come first.

---

The primary company that [Dean Logan contracted to implement the VSAP program](#) was Smartmatic USA Corporation.

## Registrar-Recorder/County Clerk signs contract with Smartmatic USA

By Michael Sanchez | No comments yet | Uncategorized

On June 13, 2018, Los Angeles County Registrar-Recorder/County Clerk **Dean Logan** officially signed the contract with **Smartmatic USA** making them the Voting Solutions for All People's (VSAP) Prime Contractor and Systems Integrator. Smartmatic USA will assist the Registrar-Recorder/County Clerk (RR/CC) in manufacturing and implementing components of a new voting experience for Los Angeles County scheduled for introduction in the March 2020 California Presidential Primary election.

Following an extensive 9-month bidding and evaluation process, Smartmatic USA was selected after being scored by technical, legal and financial evaluators in accordance with Los Angeles County's competitive procurement policies. **The Los Angeles County Board of Supervisors unanimously approved the contract during on June 12, 2018.**

Take note that they mention it was an “extensive 9-month bidding and evaluation process” before they ultimately chose Smartmatic. Here is the [LA County Board of](#)

[Supervisors “statement of proceedings”](#) showing the approval of the \$2 contract with Smartmatic USA Corporation:

Board of Supervisors

Statement Of Proceedings

June 12, 2018

## 22. Prime Contractor Implementation Services Under the Voting Solutions for All People Project Contract

Recommendation: Authorize the Registrar-Recorder/County Clerk to execute a contract with **Smartmatic USA Corporation** to provide prime contractor services described under Voting Solutions for All People, effective June 12, 2018 through March 31, 2027 with three two-year extension options, for a maximum amount of **\$282,097,321**, including the extensions through March 31, 2033, with the funding included as part of the Fiscal Year 2018-19 Final Changes and funding for future years to be requested through the annual budget process; execute future amendments to extend the contract for three two-year extension options; execute increases to the original contract amount by no more than 10% to accommodate unforeseen increases during the contracting period; execute change notices for additional goods and services with allocated pool dollars in an amount not to exceed \$28,419,598; issue written notice(s) of partial or total termination of the contract for convenience; and execute future amendments to reflect changes to new legislation or changes to County policy terms and conditions.

**(Registrar-Recorder/County Clerk)** *(NOTE: The Chief Information Officer recommended approval of this item.)* (Relates to Agenda Nos. 23 and 24) (18-2948)

**This item was taken up with Item Nos. 23 and 24.**

**Eric Preven, Ankur Patel, Gabriel Taylor, Anthony Avery, Herman Herman and George Buzzetti addressed the Board.**

**Dean Logan, Registrar-Recorder/County Clerk, addressed the Board and responded to questions. Sachi A. Hamai, Chief Executive Officer, also responded to questions posed by the Board.**

**After discussion, on motion of Supervisor Barger, seconded by Supervisor Solis, this item was approved.**

**Ayes:** 5 - Supervisor Solis, Supervisor Ridley-Thomas, Supervisor Hahn, Supervisor Barger and Supervisor Kuehl

**Attachments:** [Board Letter](#)  
[Video](#)

You'll notice as we go through this article that every time Dean Logan presents something to the LA County Board of Supervisors, it comes with the recommendation

from the Chief Information Officer:

---

(NOTE: The **Chief Information Officer** recommended approval of this item.)  
(20-5400)

---

The CIO for LA County at the time all of this was happening is a gentleman named William Kehoe:

In June of 2021, Kehoe accepted a job as the state CIO with Washington Technology Solutions (WaTech). The story gave some insight into his background:

---

## WaTech

June 10, 2021

### Story

Gov. Jay Inslee today named William Kehoe state chief information officer (CIO) with Washington Technology Solutions (WaTech) effective August 1. He replaces [Mark Quimby](#) who has served as acting CIO since March when former CIO James Weaver departed from the agency earlier this year. Quimby will return to his position of deputy director for technology and operations.

Kehoe is currently CIO for Los Angeles County, where he has served since 2017. In the position, he made innovation the central tenet of the office, bringing business and IT together to transform the technology strategy and policy in security, information management, governance, and project investment and oversight. More recent work includes the initiation of a regional strategic plan to close the digital divide in the county.

Kehoe has a long history of managing information technology departments in local and state governments, including over 15 years in Washington state agencies and counties. Before working as CIO in Los Angeles, he served as CIO for [King County](#) and the Washington State Department of Licensing (DOL).

---

Kehoe was CIO for King County (Seattle), Washington while Dean Logan was the director of elections for King County. Interesting that they both ended up in LA County and happen to be the ones intimately involved in setting up the VSAP project.

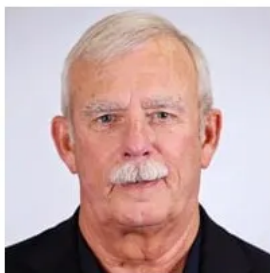

Let's go back to Smartmatic and who [they list on their Board of Directors](#):

---

[Peter Neffenger](#)

Chairman

[Robert Cook](#)

Executive Director

[Gracia Hillman](#)

Director

[Paul DeGregorio](#)

Director

---

The reason I'm pointing out Paul DeGregorio is because he seems to be awfully chummy with Dean Logan. [Paul DeGregorio posted pictures on his Facebook account](#) back in December of 2017 providing some insight into his relationship with Dean:

## Votem

Just 3 days after Dean Logan signed the contract with Smartmatic, [Votem posted a news story on its website](#) regarding their involvement with VSAP:

---

### Votem Corp Selected For LA VSAP Project In Partnership With Smartmatic

© WebAdmin 📅 June 16, 2018

An innovative voter-centered election system will modernize the way Los Angeles County citizens will cast their ballots. In partnership with **Smartmatic**, who was awarded a contract to assist LA County in the design, construction, and deployment of the new voting solution, **Votem will facilitate the development of the new system's interactive ballot display.**

Since 2009, the Registrar-Recorder County Clerk has been working on an initiative called Voting Solutions for All People (**VSAP**) to replace the County's aging voting system that lacks technical and functional elasticity necessary to continue to accommodate a growing and increasingly diverse electorate.

"We are extremely pleased to be taking this important step forward in delivering on our commitment to modernize the voting experience in Los Angeles County and to lead in the development and implementation of a non-proprietary, publicly-owned voting system that is responsive to the needs and behavior of our electorate," said Dean Logan, Registrar of Voters, following the awarding of the contract at the Board of Supervisors meeting on Tuesday.

Votem and its team will be responsible for the interactive ballot display and implementation, as designed by and for Los Angeles County, in partnership with IDEO, during prior phases of the VSAP initiative that focus on security, accessibility and usability. **The interactive sample ballot display will allow for voters to mark their choices on their mobile device - anywhere, anytime - and then scan in their QR code in person for fast and easy voting at a vote center.**

---

[Votem is what brings the first Konnech Inc. connection to LA County:](#)

# Votem Announces Acquisition of Mobile Voting Business

👤 WebAdmin 📅 February 15, 2016

**CLEVELAND, OH. FEBRUARY 15, 2016. VOTEM CORP ANNOUNCES THE ACQUISITION OF THE MOBILE VOTING BUSINESS FROM MICHIGAN-BASED KONNECH INC.**

Votem announced the acquisition of the mobile voting business from Michigan-based, **Konnech Inc.** This business unit and related product line called **"ABVote"**, brings Votem a set of leading voting systems products in use by many progressive jurisdictions including the State of Montana and Washington, DC.

The ABVote product line includes several distinct products including online and mobile voter registration and absentee ballot request for absentee / military / overseas and disabled voters. Many of these products have received broad industry support like the **Vote4DC** online and mobile apps which have been recognized by the Federation for the Blind as the leading accessible product on the market.

Pete Martin, CEO of Votem, stated, "We are so pleased to add the ABVote product line as a complement to our Mobile Voting Platform (MVP)". Eugene Yu and his team have built outstanding products for the mobile and online voting space. Even more importantly, they have given care and attention in deploying them at jurisdictions such as the State of Montana and Washington, DC so Votem benefits from now having an end-to-end mobile voting product line as well as a larger satisfied customer base. **Eugene and Konnech are well respected in this industry and we look forward to continuing our partnership with them well into the future."**

---

[Two years after Votem acquired ABVote from Konnech, they acquired another company:](#)

---

# Votem Acquires Everyone Counts

By **Adam Burroughs** On October 5, 2018

CLEVELAND

Cleveland's *Votem* has acquired *Everyone Counts*, combining strengths in blockchain voting and online voting and voter registration to create an elections management solutions provider. Combining *Votem*'s mobile and blockchain voting platform with *Everyone Counts*' vast experience and expertise in delivering online elections (*Everyone Counts* is the company that transitioned voting for the Emmys online) helps voting administrators and election management bodies better meet the unique and disparate needs of their eligible voters. "Both *Votem* and *Everyone Counts* were founded with a similar mission to make voting more accessible, secure and transparent with the shared objective to instill confidence in voters that their ballot was cast the way they intended," said Pete Martin, founder and CEO of *Votem*, in a statement. "With two decades of leadership in online voting combined with the most advanced voter registration/election management system available today, teaming with *Everyone Counts* is an obvious fit for *Votem* as we grow our company and expand our offerings."

---

This basically brings us full circle because *Everyone Counts* brings us right back to Paul DeGregorio:

---

# Paul DeGregorio

[+ Subscribe](#)

---

Mr. Paul DeGregorio served as commissioner of the United States Election Assistance Commission (EAC) from 2003-2007, and during his tenure at the EAC served as chairman. At the EAC, Mr. DeGregorio oversaw federal election reform, such as the implementation of the Help America Vote Act and the establishment of the first federal certification of voting systems.

Prior to the EAC, Mr. DeGregorio was Executive Vice President of the International Foundation for Election Systems (IFES). At IFES he also was senior election adviser. He promoted internet voting technologies and automation as **Chief of Elections of Everyone Counts, Inc.**

---

Let's examine a timeline so we can fully understand what is happening here:

- 2004 - Dean Logan is Director of Elections for King County, William Kehoe is CIO for King County - King County happens to find the votes needed for Gregoire to win gubernational race
- July 2008 - Dean Logan becomes LA County CC/RR
- 2009 - Dean Logan starts his VSAP project
- February 15, 2016 - Votem acquires ABVote from Konnech Inc. to boost Votem's mobile voting platform
- October 2017 - LA County begins 9-month bidding process with election companies for VSAP project
- December 2017 - Paul DeGregorio attends overseas conference in Jordan with his "good friend" Dean Logan

- June 13, 2018 - LA County via Dean Logan signs contract with Smartmatic for \$282m + to work on VSAP project
- June 16, 2018 - Votem announces they have partnered with Smartmatic to work on VSAP project - responsible for interactive ballot for mobile devices (mobile devices = ABVote which they acquired from Konnech Inc.)
- October 5, 2018 - Votem announces they have acquired Everyone Counts, a voting company of which Paul DeGregorio serves as “Chief of Elections”

+ Subscribe

The connection between Smartmatic, Everyone Counts, Votem, and Konnech Inc. may very well be innocent but it is super interesting that a little over a year later, Konnech Inc. received the [first of two purchase orders from LA County via Dean Logan](#):

---

If Yes, please explain why: On **October 10, 2019**, ISD issued a purchase order (PO) to Konnech Inc. (PO-RR-20006222-1) for a one-year PollChief commercial, off the shelf software license for **\$99,900** for RR/CC to utilize for March 2020 Election. To account for the necessary customizations required for RR/CC to utilize this solution for LA County's recruitment process, a second PO was issued to Konnech (PO-RR-21005183-1), in **July 2020** for **\$199,999**. Konnech provides a proprietary software product and is the only authorized maintenance and support service provider for PollChief.

---

LA County contracted with Konnech Inc. to implement their PollChief election management software. I'll get into this a little bit more later. Something interesting happened between October 2019 and July of 2020 - the LA County primary elections in March of 2020. [The primary elections were reportedly accompanied with a “cascade of failures.”](#)

One of the interesting failures had to do with PollChief. [From a report published by Dean Logan himself:](#)

### **Lack of an effective data warehouse affected recruitment and tracking of Workers.**

+ Subscribe

The existing Election Management System, DIMSnet (DIMS), is not capable of supporting the assignment and tracking of workers for multiple days. The inability to track assignments and run reports in DIMS resulted in manual processes that did not give RR/CC visibility of the recruitment status for each Vote Center.

Although RR/CC procured PollChief, which is a database that organizes communications and logistical details for Vote Centers and Election Workers, the system was procured after Election Worker recruitment had begun. Although productive work was completed, further development of the system was suspended and PollChief was not implemented because of the amount of customization work required to adapt to the needs of RR/CC.

Even though they signed a contract with PollChief in October of 2019, they weren't able to use it for the primary elections "because of the amount of customization work required to adapt to the needs of the RR/CC." They offered the other contract in July of 2020 but the original one-year contract between LA County and Konnech Inc. for the software license was set to expire in October of 2020. In order to avoid that, Dean Logan started laying the groundwork for a sole source contract of a much larger scale.

This is where things get even more interesting. [On literally the same exact day, at the same exact LA County Board of Supervisors meeting](#), the Board of Supervisors approved the acceptance of a grant from the Center for Tech and Civic Life (CTCL) while also approving a whopping \$2,645,000 contract for Konnech Inc. and their PollChief product:

# Press Release: CTCL Receives Additional \$100M Contribution to Support Critical Work of Election Officials

**Media contact:** [press@techandcivicliflife.org](mailto:press@techandcivicliflife.org)**October 13, 2020****PRISCILLA CHAN AND MARK ZUCKERBERG COMMIT ADDITIONAL \$100 MILLION FOR SAFE AND RELIABLE VOTING TO MEET OVERWHELMING DEMAND*****Additional funds build on \$300 million commitment, will meet requests for support from local election jurisdictions that surpassed initial commitment***

CHICAGO, IL – The Center for Tech and Civic Life (CTCL) announced today that Priscilla Chan and Mark Zuckerberg have responded to unprecedented demand for support from local election jurisdictions across the country by committing an additional \$100 million to promote safe and reliable voting. Given the lack of public funds and unique challenges to election administration due to the COVID-19 pandemic, demand for the funds is on track to surpass the \$300 million Chan and Zuckerberg committed to states and localities on September 1st. This new commitment will also ensure that election administrators are fully funded despite a number of legal challenges that have been filed to try to undermine their efforts.

To date, more than 2,100 local election jurisdictions have submitted applications for support to CTCL. Chan and Zuckerberg's commitment will ensure that every qualified jurisdiction that applies will be approved for the funds they need to ensure that every eligible citizen can vote safely and have their vote counted.

Building on their original donation of \$300 million, Chan and Zuckerberg's commitment to supporting election infrastructure for this election cycle now totals \$400 million. They have made a commitment to CTCL to increase funding by up to \$100 million beyond the \$250 million already committed to continue their work to provide officials with the staffing, training and equipment necessary to make sure that every voter can participate in a safe and timely way in the election.

October 13th, 2020 seems to be such an important day. Not only was it the day the CTCL received \$100m from Zuckerberg, and not only was it the day LA County received money from the CTCL and signed a contract with Konnech Inc., but it's also the same day that Detroit announced a contract with Konnech Inc. for PollChief using funds from the CTCL (screenshot from documents provided by True the Vote):

**Elections - Emergency - continued**

3045877 100% City Funding – To Provide Ballot Scanning Software for August and November Elections and Software Modules. – Contractor: **Konnech** – Location: 4211 Okemos Road Suite 3 & 4, Okemos, MI 48864 – Contract Period: Upon City Council Approval through June 30, 2021 – Total Contract Amount: \$186,624.00.

**Costs budgeted to Elections Grant Fund, Acct. 2117-20836-700010-626100-350999-0-0, Appropriation for Safe Voting Plan Grant indicates \$1,921,575 has been encumbered, available funding of \$1,163,286 available as of October 9, 2020.**

**Funding is through the Grant of \$3,512,000 received from the Center for Technology and Civic Life [CTCL], approved the Week of August 31, 2020. There is a Detroit Safe Voting Plan that was submitted to CTCL in support of the application for the grant.**

**Bids were solicited and 2 responses were received from Konnech and Distro Systems.**

**Elections Dept. indicated that Konnech has been the contractor for Elections software for many year, and has created software modules specifically for Detroit.**

**City of Detroit has used **PollChief** as the election management system to organize elections logistics; Konnech is the manufacturer and sole distributor of this software.**

**This particular software, for ballot scanning is indicated to be a “fast scanning” software which is necessary to address the significant increase in absentee voting.**

**This software was provided for the August Primary, and will also be used for the General Election in November.**

Yes, that definitely could just be a coincidence - but what if it isn't? Was the CTCL money being used specifically for these jurisdictions to bring Konnech Inc. into these elections? Are there other jurisdictions which had both a CTCL grant and a contract with Konnech Inc.?

Here is what's concerning about PollChief. There was a presentation done in Leon County, Florida in which the “Presenter,” who was trying to get the county to use PollChief, described PollChief's access to the machines. [The presentation appears to have been taken offline but the screenshots still exist:](#)

Presenter  
The voting machine testing operation is integrated into PollChief to store testing histories, precinct, assignments, and seal data  
Once completed, the machines are automatically assigned to their precincts and show in the appropriate check-out screens. We were tight on floor space, so we built machine racks to house 250 units where we also perform the testing and diagnostics.

Integration

SUPERVISOR  
LEON COUNTY FL

+ Subscribe

“The voting machine testing operation is integrated into PollChief to store testing histories, precinct, assignments, and seal data.”

If PollChief has access to the machines testing operation, they have access to the machines themselves, and if PollChief has access to the machines themselves, then the CCP has access to the machines themselves. We know this because Konnech Inc. is on China’s Unicom:

|---------------|---------------------------------|---------|-----|--|

That is the story of the “Tiger Project” we were told at the PIT - a company intimately involved in our elections has a server in Wuhan, China that is connected to China’s Unicom. True the Vote was able to see over 1.8 million names of United States Poll Workers and their Children on that server. I’m not a techy guy, but this is one of the 100s of connections alluding to Konnech Inc. being connected to China.

For more great articles on Konnech’s connections to China, I urge you to read a few articles from Kanekoa the great:

- [U.S. Election Software Company Previously Built Confucius In 'Communication Platform' \(substack.com\)](#)
- [Investigation Into U.S. Election Software Company Uncovers Chinese Coders \(substack.com\)](#)

[+ Subscribe](#)

The fact that Konnech Inc. has so many connections to China is concerning in and of itself, but to really understand the problem here, [we need to understand more about China Unicom](#):

---

# China Unicom

---

From Wikipedia, the free encyclopedia

## **China United Network Communications Group Co., Ltd.**

(Chinese: 中国联合网络通信集团有限公司; pinyin: *Zhōngguó liánhé wǎngluò tōngxìn jítuán yǒuxiàn gōngsī*) or **China**

**Unicom** (Chinese: 中国联通; pinyin: *Zhōngguó liántōng*)

(**CUniq** in short) is a Chinese state-owned telecommunications operator. Started as a wireless paging and GSM mobile operator, it currently provides a range of services including mobile network, long-distance, local calling, data communication, Internet services, and IP telephony.

---

In a recent article of mine, I discussed Joe Biden using his powers as President to benefit the CCP and the 'Biden Crime Family.' How fitting that the same article I discussed in that article is relevant to this one.

+ Subscribe

From Patel Patriot's article titled "[Joe Biden Executive Order Proves He Is Sold Out to the CCP:](#)"

---

This story, which displays massive conflicts of interest, reminded me of an executive order from Trump that is worth a thorough examination. [Executive order 13959](#) is most interesting. It came just 5 days after Joe Biden was declared the winner of the 2020 election. Remember, executive orders aren't just typed up and released within a day. They require thought and planning. It could take days, even weeks from start to finish to have a proper executive order drawn up using the proper authorities in which to legally execute it. This executive order was in the works for a while, and it is no coincidence that it was published after the election was stolen for Joe Biden. You'll see that the Biden Crime family was in the crosshairs of what this executive order would accomplish.

## The OG EO

[Let's examine executive order 13959 in full:](#)

Executive Order 13959 of November 12, 2020

## Addressing the Threat From Securities Investments That Finance Communist Chinese Military Companies

By the authority vested in me as President by the Constitution and the laws of the United States of America, including the International Emergency Economic Powers Act (50 U.S.C. 1701 *et seq.*) (IEEPA), the National Emergencies Act (50 U.S.C. 1601 *et seq.*), and section 301 of title 3, United States Code,

I, DONALD J. TRUMP, President of the United States of America, find that the People's Republic of China (PRC) is increasingly exploiting United States capital to resource and to enable the development and modernization of its military, intelligence, and other security apparatuses, which continues to allow the PRC to **directly threaten the United States homeland and United States forces overseas**, including by developing and deploying weapons of mass destruction, advanced conventional weapons, and **malicious cyber-enabled actions against the United States and its people.**

+ Subscribe

Key to the development of the PRC's military, intelligence, and of its security apparatuses is the country's large, ostensibly private economy. Through its national strategy of Military-Civil Fusion, the PRC increases the size of the country's military-industrial complex by compelling civilian Chinese companies to support its military and intelligence activities. Those companies, though remaining ostensibly private and civilian, **directly support the PRC's military, intelligence, and security apparatuses and aid in their development and modernization.**

At the same time, those companies raise capital by selling securities to United States investors that trade on public exchanges both here and abroad, lobbying United States index providers and funds to include these securities in market offerings, and engaging in other acts to ensure access to United States capital. In that way, the PRC exploits United States investors to finance the development and modernization of its military.

I therefore further find that the PRC's military-industrial complex, by directly supporting the efforts of the PRC's military, intelligence, and other security apparatuses, constitutes an unusual and extraordinary threat, which has its source in substantial part outside the United States, to the national security, foreign policy, and economy of the United States. To protect the United States homeland and the American people, I hereby declare a national emergency with respect to this threat.

---

Essentially, this executive order by Trump put forth a list of Communist Chinese Military Companies (CCMCs) and required US investors from owning any equity in those companies due to the threat they posed to US national security. Joe Biden would change the language in the EO to allow Hunter to keep his CCMC related investments.

How that EO relates to this story is that one of the companies Trump listed back on November 12th, 2020 (which is still on that list today) is China

+ Subscribe

China United Network Communications Group Co Ltd

---

Just so you fully understand, let me reiterate - roughly 5 days after Joe Biden was declared the winner of the 2020 election, Trump happens to list China Unicom as a CCMC. Konnech Inc. - a company with Chinese connections, has a server in Wuhan, China that is connected to the China Unicom internet.

This isn't even the only connection to China that we find in this LA County story. Dean Logan himself has multiple. [Here is a screenshot from Dean's LinkedIn account.](#) I apologize for the small print on this first picture, but I wanted to get it all in one clip to prove it's from his account:

Fair enough with regard to the Presidential contest, but the votes counted and reported by local election administrators are, indeed, about reporting the will of the majority of those voting -- even in federal elections that include the Presidency as well as majority-elected representatives to the U.S. Senate and House.

Dean Logan posted this · 3w

Elections are for the purpose of discerning the will of the majority. Inherent in that are values of access and participation that, in turn, require time and accuracy. Expedience for purposes of appeasement and instant gratification aren't acceptable tradeoffs.

[CSUN also has a China Institute:](#)

## About Us

[+ Subscribe](#)

As an outgrowth of the increasing interest and new affiliations in China, the China Institute was established in 1982, under the Office of the Vice President for Academic Affairs. Its membership numbers more than two hundred faculty, staff and members of the community who are committed to enhancing US–China relations. Since its inception, the China Institute has played a major role in making the CSUN exchange programs with China among the best in the nation. Its achievements include assisting in arranging for the signing of Memoranda of Understanding with 67 Chinese institutions of higher education, an accomplishment which has resulted in an almost continuous exchange of faculty and students; implementing youth programs and international conferences in China and the United States; making arrangements for numerous visiting Chinese delegations; inviting to the campus three Chinese ambassadors to the U.S. to give lectures; and co-hosting the visits of the President of the People’s Republic of China, Li Xiannian, Vice Premiers, Fang Yi and Tian Jiyun, and the Minister of Education, He Dongchang.

In conjunction with its role in organizing many of the Pacific Rim programs of the University, the China Institute has promoted innumerable diverse academic and cultural activities, such as lecture series, forums, faculty and student exchanges, film festivals, performances and exhibits in arts. A film Archive is maintained for university use. It has a thirteen-part documentary film on Chinese Art, covering the period from the Tang through Qing dynasties, which was procured through a grant from the CSUN Foundation. There are feature films on Chinese history which have been acquired through the exchange programs with the PRC. In addition, the China Institute has supervised and at times assumed the cost of sending thousands of books to education institutions in China. Its members in the San Fernando Valley Chinese Cultural Association have donated thousands of dollars to establish more than 100 rural libraries in China. It has also assisted in the establishment of the first alumni chapter of a U.S. institution in China. In recent years, the China Institute has facilitated the visits and performances of many CSUN arts and music faculty and students in China, including Women’s Chorale performances in seven universities in China, CSUN theatre and film students’ joint performances with Shanghai Normal University students at the World Expo, which were highly praised by Secretary of State Hilary Clinton, and piano concerts and master classes by Professor Dmitry Rachmanov all over China.

A number of publications are issued by the China Institute, including the annual Newsletters, which summarize our exchange programs with China, and advocate new and promising collaboration projects, collections of comparative study papers by Chinese visiting scholars, and reports of research conducted by Chinese scholars during their tenure at CSUN. The China Institute also maintains an active website with updated news and photos on “CSUN in China” and “China at CSUN.” The China Institute has been an important factor in the internationalization of CSUN, especially as it pertains to increasing our understanding of China and the Chinese people.

---

I’m not sure why this China Institute at CSUN isn’t part of the “Confucius Institute” program since it appears on the surface to be the exact same thing. [Remember what Mike Pompeo said about the Confucius Institutes prior to the 2020 election:](#)

---

Last Updated: 2nd September, 2020 11:44 IST

# Mike Pompeo Seeks Closure Of China Confucius Institutes By Year End

+ Subscribe

Pompeo said that he was hopeful about the shut down of Chinese Confucius Institute cultural centres on US university campuses by the end of the year.

Written By [Kunal Gaurav](#)

US State Secretary Mike Pompeo said that he was hopeful about the shut down of Chinese Confucius Institute cultural centres on US university campuses by the end of the year. Last month, the United States designated the Confucius Institute, a China-affiliated global education programme, as a foreign propaganda mission.

Speaking to Fox Business Network, the top US diplomat said that everyone has the risk associated with the programme, accusing the institutes of working to “recruit collaborators” at colleges of the United States. Pompeo opined that the colleges have the ulterior motive of the Chinese government-funded institutes and that they will be hopefully closed before the end of this year.

+ Subscribe

In August, the State Department released a “fact sheet” on Confucius Institutes, alleging that the organisation delivers “skewed” Chinese language and cultural training to US students as part of China’s “multifaceted propaganda efforts”. It added that the “opacity” of the organisation and its “state-directed nature” were the driving reasons behind the decision.

**Read: [US Designates Confucius Institute As Chinese 'foreign Mission' For Its 'opacity'](#)**

**Read: [Mike Pompeo Condoles Pranab Mukherjee's Death, Hails His 'visionary Leadership'](#)**

The designation alone doesn’t close the Washington-based Confucius Institute US Center (CIUS), de facto headquarters of the CI network, nor US colleges and universities will have to close individual CIs. The CIUS will have to regularly provide information to the State Department about their personnel, recruitment, funding, and operations in the United States, similar to the restrictions placed on diplomatic embassies.

**“The United States wants to ensure that students on U.S. campuses have access to Chinese language and cultural offerings free from the manipulation of the Chinese Communist Party and its proxies,” Pompeo had stated.**

”

That isn’t even Dean Logan’s only connection to China. Dean went to China on a “leadership exchange” back in 2000 (Feel free to skip down to the highlighted part of Dean’s Bio):

Los Angeles County **REGISTRAR-RECORDER/COUNTY CLERK**

[+ Subscribe](#)

DEAN C. LOGAN  
Registrar-Recorder/County Clerk

Dean Logan was appointed Registrar-Recorder/County Clerk for Los Angeles County, California on July 9, 2008, previously serving as the Acting Registrar-Recorder/County Clerk and as Chief Deputy.

The Registrar-Recorder/County Clerk is responsible for registering voters, maintaining voter files, administering federal, state, local and special elections and verifying initiatives, referenda and recall petitions. Los Angeles County, with more than 500 political districts and 4.4 million registered voters, is the largest and most complex county election jurisdiction in the country.

The Registrar-Recorder/County Clerk also records real property documents; maintains vital records of births, deaths and marriages; issues marriage licenses; performs civil marriage ceremonies; and processes business filings and other documents. Annually, the Department records more than 2 million real estate documents, issues 1 million certified copies of vital records, issues 59,000 marriage licenses and processes more than 20,000 fictitious business name filings. The Department serves an estimated 3,500 customers daily.

Mr. Logan has over 20 years of experience in elections administration, records management and public service. Prior to moving to Southern California, Mr. Logan served as the Director of Records, Elections and Licensing Services for King County, Washington; as State Elections Director for the Washington Secretary of State; and as the elected County Clerk and Chief Deputy County Auditor in Kitsap County, Washington.

Currently, Mr. Logan serves on the Executive Board for the California Association of Clerks and Election Officials (CACEO). He also serves on the California Secretary of State's Statewide Voter Registration System Advisory Committee; the National Election Center's Task Forces on Education & Training and Election Reform; the James T. Irvine Foundation task force on the Future of California Elections; and the Pew Center on the States' Voter Registration Modernization and Performance Index for Elections working groups.

In 2012, Mr. Logan was recognized nationally by the Election Verification Network (EVN) for his efforts to ensure secure, transparent and open elections. He is also the recipient of a Distinguished Leadership Award from Sprint USA and the National Association of Community Leadership (1999). In 2007, Mr. Logan served as an International Election Observer in Morocco with the National Democratic Institute. He also traveled to China in 2000 on a political leadership exchange and to the former Soviet Union in 1986 as part of a citizen diplomacy delegation.

Mr. Logan holds a Bachelor of Science (magna cum laude) in Organizational Leadership from Azusa Pacific University and an Executive Master of Public Administration from the Evans School of Public Affairs at the University of Washington. Additionally, he is certified as an Elections and Registration Administrator and as a Professional County Official.

## Closing

In my 4th Addendum series article titled [“Draft Executive Order,”](#) I discuss the Draft EO that was dated December 16th, 2020. It’s just a draft so Trump did not sign it but it still provided some interesting information about multiple election companies, including Smartmatic:

The draft order also states there is “**evidence of international and foreign interference in the November 3, 2020, election.**” The fact that this order was on standby and ready to be issued (and we don’t know for sure it wasn’t), tells me they had evidence of foreign interference. They then go on to list multiple entities with issues:

There is also probable cause to find that **Dominion Voting Systems, Smartmatic, Electronic Systems & Software, and Hart Inter Civic**, Clarity Election Night Reporting, Edison Research, Sequoia, **Scytl**, and similar or related entities, agents or assigns, have the same flaws and were subject to **foreign interference in the 2020 election in the United States.** There is probable cause to find these systems bear the same crucial code “features” and defects that allowed the same outside and foreign interference in our election, in which there is probable cause to find votes were in fact altered and manipulated contrary to the will of the voters.

The draft EO names Smartmatic as one of the companies with “the same flaws” as Dominion Voting Systems. The flaws he is referring to is being “intentionally and purposefully designed with inherent errors to create systemic fraud and influence election results.”

Earlier we went over the connections between Smartmatic, Everyone Counts, Votem, and Konnech Inc.. Three of those four companies are part of the [Election Infrastructure Subsector Coordinating Council \(EISCC\)](#), which I discussed in Devolution - Part 5:

## Organizing Members of the EISCC include:

---

[Here is a quick reminder as to why that is a concern:](#)

---

Dominion Voting Systems and Smartmatic were two of the members which “advises and assists” our government with election security. They worked with the DHS to develop, recommend, and review sector-wide plans, procedures, and effective practices in support of infrastructure protection, including training, education, and implementation”. They were also making “recommendations to appropriate authorities to mitigate impediments to effective critical infrastructure security”. Read again the EISCC Mission and Purpose.

+ Subscribe

The mission of the Council is to advance the physical security, cyber security, and emergency preparedness of the nation's election infrastructure, in accordance with existing U.S. law. This mission will be accomplished through voluntary actions of the infrastructure owners and operators represented in the Council, as set forth in Presidential Policy Directive/PPD-21 and related authorities.

Our Government knew there was a conflict of interest because they had to sign a waiver certifying they knew. Yet, the members of the EISCC who were the very companies used for basically every aspect of the 2020 election (machines, ballot printing, etc.) were also in charge of the “physical security, cyber security, and emergency preparedness of the nation’s election infrastructure” and they HAD NO OVERSIGHT.

---

Our government has made our election infrastructure so convoluted and has allowed so many conflicts of interests to be ignored in the implementation and security of our elections, that it is impossible for us to trust any outcome moving forward until we throw out the machines and get back to same day voting with paper ballots and verifiable voter identification. We already knew that.

I know you’re probably thinking something like “Yeah Patel, we know our elections are corrupt. We know the people who are in charge of running our elections are one big cesspool of foreign interests and shady deals. This isn’t anything new.”

I agree with you.

As I have said before - in order to remove a cancerous tumor, you need to remove the root cause of the cancer and make sure that when you remove it, there isn't any cancer left. Deal with the cancer to LA County. Whatever is going on here needs to be investigated fully. I can only go so far with open-source information.

+ Subscribe

Our duty as American citizens is to expose the corrupt officials in our government and remove them from office, so this is me exposing what I have found about LA County. It's up to the rest of us to vote in these 2022 midterms and remove as much of the corruption as possible.

We can't remove the corruption unless we expose it first.

THE BEST IS YET TO COME

**Amy Loftus** 5 hr ago

This is amazing. Thank you!!!! Do you know LA County is asking for proof of vaccination to become a poll worker? I have the proof, I can send you a picture where they list it, and I keep trying to apply online to no avail. But no mandates exist here anymore, not even a vaccine mandate for kids in LAUSD.
